COMMENTS ON *THE GREAT CLASS WAR 1914-1918*:

"The Great Class War provides an eloquent synthesis of evidence that World War One's causes, events, impacts on different individuals and groups, ending, and aftermath are all best understood in terms of a focus on different social classes in the various countries caught up in the sweep of this momentous war. Pauwels shows that the class dynamics of particular countries determined who wanted war, who benefited from it, and who bore the brunt of suffering from it. Readers of this masterful book will recognize the extent to which so much of the literature on World War One, with its focus on secret treaties, bumbling diplomacy, inept military leaders, and particular battles simply obscures the fundamental character of the war and its differential impacts on various groups of people." (*Alvin Finkel, Professor Emeritus at Athabasca University*)

"Written at a definite angle to most existing approaches, *The Great Class War* shifts the emphasis from military history and geopolitical rivalries to the conflicts raging inside the World War's belligerent societies. With this engagingly written account, Jacques Pauwels delivers a popular counter-history of the conflict whose dissenting verve seems long overdue." (*Geoffrey Eley, Professor of Contemporary History, University of Michigan, Ann Arbor*)

"A panoramic and persuasive history of the First World War...Pauwels convincingly disposes of two familiar views of the war: the reactionary myth that the war was glorious, and the liberal belief that it was meaningless. In fact, this book shows, the war makes more sense if you grasp the ideological motivation of the elites, which was to crush the working class and strengthen the hierarchies of old Europe." (*David Tough, Trent University*)
